

Egg Carton Caterpillar

You will need:

- A cardboard egg carton
- Paint and paintbrushes (recommended), or crayons/markers
- Two sticks or one pipe cleaner
- Glue
- (optional) Two buttons or googly-eyes and glue

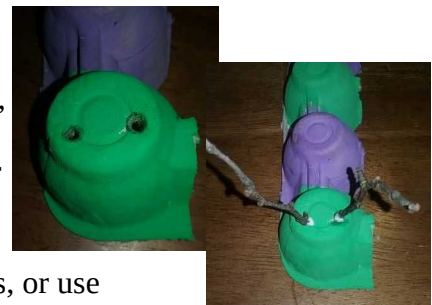

1. Take just the bottom part of the egg carton and cut it in half lengthwise. Trim off any extra flaps of

cardboard.

2. Turn it upside-down and paint/color it whatever color or colors you want! If using paint, wait for it to dry.

3. On one end, poke two holes in the top. Take two sticks and put them in these holes to form the antennae, and use a dab of glue to secure them. You could also thread one pipe cleaner through both holes, or use your imagination to come up with different antennae!

4. Below the antennae, glue buttons as eyes, or use googly-eyes if you have them. You can also just use markers or more paint to make the eyes. Use paint, markers or crayons to make a mouth.

And you have a caterpillar!
